

COMPACT ,MINI VAN , SUV . RULES

All wire class type builds will go by the open wire rules all but the front bumper rule .

Compact , midsize , and Minivans, and Suv type vehicles will not be able to compete with a pointed chrysler type bumper Or home made type pointed bumper what so ever ..

If fuel tanks are deemed safe in front of rear axles and safely plugged at the inlets and vent may be left under these vehicles as well except for M P show on July 12 2019.

If you move your tank and battery they must be properly secured ,with proper clamping and zero leaks, and covered at the start of the show ,
NO EXCEPTIONS

Rules for those classes on the bumper are:

1. Any stock type bumper ,(except Chrysler pointy type) can be mounted on these builds
2. You can but weld to the frame of the car or van or suv ,plus use the four plate rule as above in the open wire rules (4x5x1/4") times four
3. Do not add any extra gussets to frame ,inside frame ect on outside of bumper
4. You can use just a 4"x4"x1/4" square tubing on front with open ends in place of a bumper.
5. There must remain the factory hole at the five inch mark or so for inspection , if there is not a hole there we will drill at least a 1/2" one for inspection purposes.
6. Or you may just weld to the factory type shocks or brackets that came from the factory.

If you are running in a patch type open class type show you are allowed 4 4x5x1/4" plates on your pre ran type compact car this is for these type classes only ..

OPEN WIRE PATCH RULES DO NOT APPLY HERE!!
